## 2- Advanced Cognitive Behavioural Therapy (CBT) Diploma

**Cognitive Behavioural Therapy (CBT) is a popular therapy paradigm that is used in the treatment of depression, anxiety, eating disorders, relationship problems and other causes of psychological distress.**

**This course provides further information and practical guidance for those who are already familiar with the basic ideas and implementation of CBT and are looking to further extend their knowledge.**

# What's Covered in the Course?

- The theory behind Cognitive Behavioural Therapy (CBT), its indications and its contraindications.
- The basics of behavioural neuroscience, the link between the nervous system and behaviour and how a grounding in this field will help you become a more effective CBT practitioner.
- The key ideas underlying three distinct types of CBT therapy – Acceptance and Commitment Therapy (ACT), Behavioural Therapy (BT), and Cognitive Analytic Therapy (CAT) – and an overview of the techniques used by practitioners of each approach.
- How CBT practitioners approach the therapy process and how they make use of materials that guide them in helping their clients make positive changes to their lives.
- How CBT-E, a special type of CBT developed for use in patients with eating disorders, works in treating eating disorder symptoms and preventing relapse.
- How CBT can be used to improve mood in people with depression and why cognitive distortions are the key to understanding depression.
- How CBT provides individuals with a set of skills that help reduce their stress levels and risk of burnout, how it can be used to cure anxiety disorders, and why it is a good treatment option for insomnia.
- Why relationship difficulties are so common, how couples and families become locked in dysfunctional patterns of relating to one another, and how CBT practitioners can help them take a healthier approach to their relationships.
- What is meant by the term “addiction”, the factors that maintain an addiction, and how a well-structured CBT programme can break the cycles that keep the addiction going.

# 6-Basic English Certification

English is a complex language for everyone, native speakers and non-native speakers alike. Understanding the building blocks of the language can be complicated unless you are able to break things down into individual elements. When it comes to learning how to read and write in English, learning more about sentence structure and verb tense can take you far.

This course gives you an overview of the basic English skills you can use to form a solid foundation. We begin by talking about sentence structure, breaking sentences down into individual parts and reviewing the details behind each one. This section also contains examples to illustrate each point. Next, we talk about elements that add more information to sentences, including objects, complements, modifiers and adverbials. Information about verb tenses along with a sample of each one follows. Finally, we include a brief discussion about formal and informal English, giving you guidelines you can use to determine when each type is appropriate.

## You Will Learn:

- Information about the two necessary parts of a sentence, along with the three types of each
- The difference between a direct and an indirect object
- The four different types of present tense
- The four different types of past tense and when to use each one
- The four different types of future tense

## Benefits of Taking This Course

- Learn more about the building blocks of English communication
- Learn when it is appropriate to use informal language and when it is better to adapt a more formal tone
- If you are currently teaching English as a second language, learn more about the fundamentals of reading and writing in English
- If you are currently learning English, understand more about how to form grammatically correct sentences to ensure your message is understood
- If you are thinking about teaching basic English to non-native speakers, refresh your own skills by taking this course

## 7- Essential Skills for First-Time Managers Certification

Taking on responsibility for a team can be a huge challenge for first-time managers, and it requires certain skills and abilities that weren't previously required. As it's such a difficult transition from an individual to a leader, it's crucial that all new managers receive the necessary skills and training from the outset.

This course will be looking at the various skills that first-time managers need in order to become better leaders, create engaged, productive teams and produce great results.

## You will Learn:

- How to adapt your mindset from an individual to a manager
- How to successfully delegate tasks
- How to motivate your team and encourage professional development
- How to build trust and relationships with your team
- How to lead by setting an example

## Benefits of Taking this Course:

- You'll gain a better understanding of what to expect and what to do as a first-time manager
- You'll learn how to achieve your goals by guiding others through tasks
- You'll be able to manage more efficiently and create productive teams
