

Oxford College of Education

**WE HELP
YOU SHAPE
YOUR FUTURE.**

**Enrol today!
Join us at anytime from anywhere.**

Oxford College of Education is prestigious a private college in the UK, which is situated 25 minutes away from London by train and a 30-minute drive from Heathrow airport—offering a distinctive alternative to traditional Education and Excellent progression for local and international students.

OCE partnership will drive your university's enrolments, enhance your global brand and accelerate your growth. We have built a trustworthy reputation - consistently delivering on promises and transforming our partners' competitive performance.

Our student can choose their study method either a self-paced online course and on campus.

Here at the Oxford College of Education, we strive to give our local and international students the best possible education and preparation for their chosen careers so that they can be confident in their skills and knowledge to make way for a successful and happy future.

We offer a modern, attractive study site and facility with friendly members of academic and non-academic staff that are here to help the students reach their potential while being in a welcoming and supportive environment. The success and growth of our college come from a dynamic, committed and innovative staff with updated CRB/DBS checks and we believe that they are our partners in our growth and our success.

The majority of students find studying and living in the UK an enjoyable and satisfying experience with rich and rewarding opportunities for study and leisure.

We endeavour to give all of our students the best possible education and preparation for their chosen careers, so they can be confident in their skills and knowledge to make way for a successful and happy future.

When we welcome new students, we accept them into the Oxford College of Education family and support them as much as possible. So, as a student, you will find a cosmopolitan treasure of different nationalities and languages. A warm, friendly, vibrant and healthy culture awaits all who visit here.

Our social media platforms, students and visitors' reviews will help you to feel confident about choosing us.

A*	56	-
A	48	20
B	40	16
C	32	12
D	24	10
E	16	6

A-Level Grade Prediction: Sample

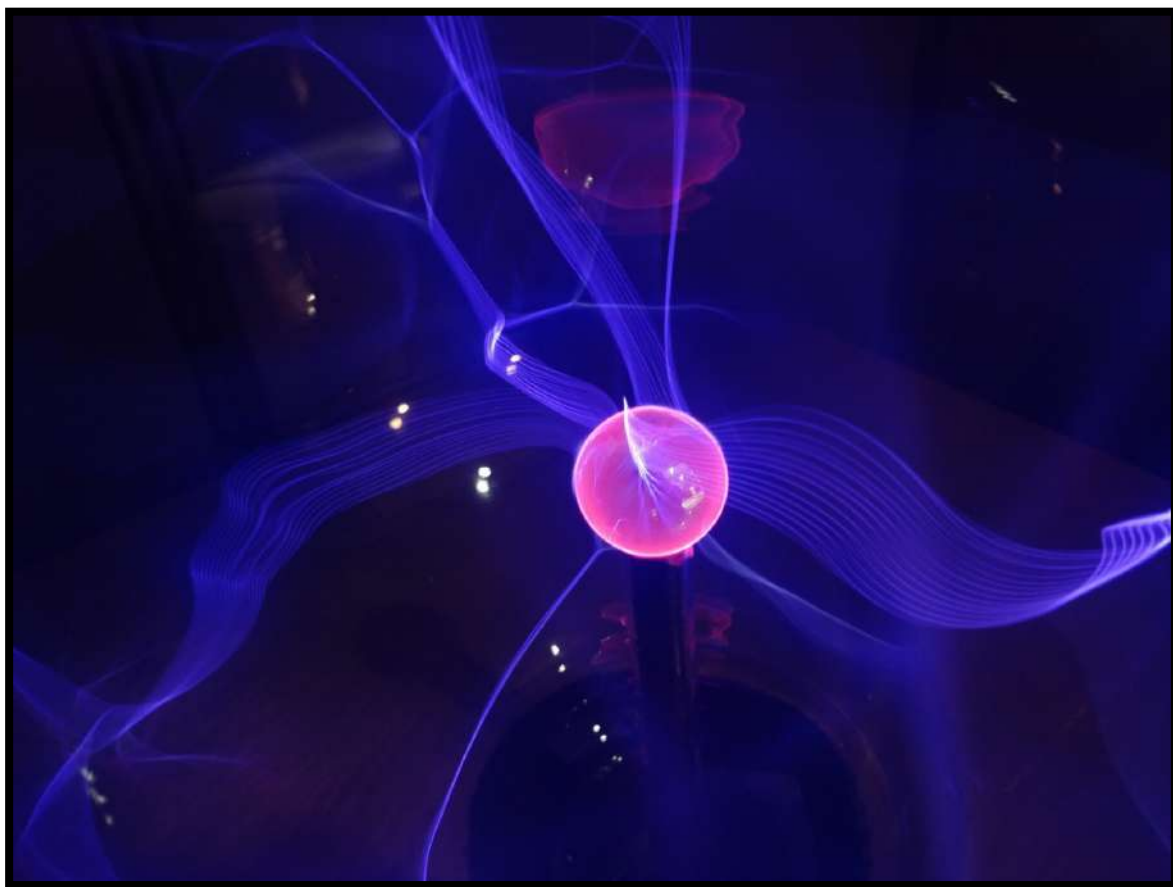

An A Level student, this student has been enrolled for a year in the two- year course. Generally on a two year course the hits will be lower and spread out simply due to the time frame.

The image above provides an example of how our online tutoring programme generates a **predicted grade** for A Level Students. Should you require a predicted grade whilst you are part-way through your studies, the data and information displayed above will be used by our college in order to produce an accurate grade prediction. This predicted grade **may then be submitted to your chosen awarding body for verification**, should you be unable to sit your final exams.

1. A-LEVEL PHYSICS

Studying A Level Physics Online

Physics is the branch of science which is concerned with matter and energy. Studying Physics provides you with an understanding of the fundamental principles of the universe, covering topics such as particles, radiation and electronics. This qualification is a gateway to higher education and is perfect for students planning on studying engineering or sciences at university. The numerical aspects of physics are also applicable to other fields involving technical mathematics.

Course code: 7408

Delivery method: Online and Paper based

Course duration: 24 Months

Entry requirements: No prior qualification needed

Award achieved: AQA A Level Physics

Awarding body: AQA

Physics course overview

During this A Level course in Physics you will cover subjects like mechanics, particles, radiation and astrophysics. Due to the scope of topics covered A Level Physics is favoured among universities and employers.

You will develop and hone your skills in the subject as well as gaining a real enthusiasm for the subject matter. Physics makes an ideal choice for those students with interests in medicine, science and engineering.

Upon successful completion of the exam and practical assessments (as administered by AQA), you will have achieved an internationally recognised AQA A Level Physics.

- Develop mathematical and problem solving skills
- Understand how Physics is used in a wider context
- Preparation for further study and or careers related to the subject
- Understand the impact sciences have on both the economy and society
- Develop scientific explanations
- Analyse and interpret data
- Marked Assessments which you access and submit through the online system.

Course Outline

This course is divided into 3 units:

Unit 1: Content from topics 1-5 and 6.1

Written examination: 2 hours. 34% of A-Level. 85 Marks

- 60 marks = A mixture of short and long answer questions
- 25 marks = Multiple choice questions

Unit 2: Content from topics 1 to 6.1, 6.2, 7 and 8

Written examination: 2 hours. 34% of A Level. 85 Marks

- 60 marks = A mixture of short and long answer questions
- 25 marks = Multiple choice questions

Unit 3: Section A: Practical skills and data analysis & Section B: Students enter for one of topics 9, 10, 11, 12 or 13

Written examination: 2 hours. 32% of A Level. 80 Marks

- 45 marks = A mixture of short and long answer questions on practical experiments and data analysis
- 35 marks = A mixture of long and short answer questions on chosen optional topic

Course Content

Structured in thirteen topics across three exams AQA A-Level Physics contains both compulsory and optional content.

If the content is listed as optional you have a choice of questions relating to these topics when you sit your exam. Your tutor may advise on what topics you should focus on when studying.

Compulsory Content:

Topic 1: Measurements and their errors
Topic 2: Particles and radiation
Topic 3: Waves
Topic 4: Mechanics and materials
Topic 5: Electricity
Topic 6: Further mechanics and thermal physics
Topic 7: Fields and their consequences
Topic 8: Nuclear physics

Optional Content:

Topic 9: Astrophysics
Topic 10: Medical physics
Topic 11: Engineering physics
Topic 12: Turning points in physics
Topic 13: Electronics

2. A-LEVEL ACCOUNTANCY

Studying A-Level Accounting Online

An A level in accounting is the perfect first step towards a potentially lucrative career as a chartered accountant or as a professional within the financial sector. Studying this subject will give you a strong numerical grounding in business finance, an essential skill in modern business or for any budding entrepreneur.

Course code: 7172

Delivery method: Online

Course duration: 360 hrs

Entry requirements: No prior qualification needed

Award achieved: AQA A Level Accountancy

Awarding body: AQA

Accountancy course overview

With no prior knowledge of accountancy necessary, this course will give you a thorough grounding in the fundamentals of both financial and management accountancy, covering general accountancy methods, such as how to use ledgers, balance sheets and income statements, as well as transferrable skills that apply more generally to business like data skills, problem solving, planning, presenting arguments and recommendations. Upon successful completion of the exam (as administered by AQA), you will have achieved an internationally recognised AQA A level Accountancy (7172) qualification.

Skills Gained

- An understanding of the theory, purpose, procedures and techniques of both management and financial accountancy.
- Learn the importance of effective accountancy management systems, as well as their limitations.
- Awareness of economic, legal, ethical, social, environmental and technical influences on decision-making in accountancy.
- Transferrable skills useful in all aspects of business, such as numeracy, strong communication skills, building and presenting an argument, ICT used in business, evaluating data and analytical, problem-solving skills.

Course outline

This course is divided into the following units:

1. An introduction to the role of the accountant in business
2. Types of business organisation
3. The double entry model (
4. Verification of accounting records
5. Accounting concepts used in the preparation of accounting records
6. Preparation of financial statements of sole traders
7. Limited company accounts
8. Analysis and evaluation of financial information
9. Budgeting
10. Marginal costing
11. Standard costing and variance analysis

12. Absorption and activity-based costing
13. Capital investment appraisal (
14. Accounting for organisations with incomplete records
15. Partnership accounts
16. Accounting for limited companies
17. Interpretation, analysis and communication of accounting information
18. The impact of ethical considerations

Assessment

The AQA A Level Accountancy qualification is gained once all exam papers are successfully completed. These exams are administered by the AQA and assessment centre details will be included with your course, as well as practice papers so that you are more than prepared for your assessments.

In addition, there will be a number of tutor marked assessments (TMAs) to ensure that you have a thorough understanding of the course materials, with the tutor sending comments to guide you through any areas of potential difficulty, as well as a range of self-assessments that are indicators that you understand the materials as you work through them. These are for your own information, and do not need to be shown to your course tutor.

Visit our website for a full overview of the A-Level Accountancy course.

www.oxfordce.co.uk

3. A-LEVEL POLITICS

Studying A-Level Politics Online

Are you intrigued by politics? Curious about government? Planning a career in the civil service? Then A Level Politics is the course for you! It is the perfect course for those looking to deepen their understanding of the world we live in, the governance of our society and for those looking to study the subject at university level.

Course code: 7512

Delivery method: Online

Course duration: 24 Months

Entry requirements: No prior qualification needed

Award achieved: AQA A Politics

Awarding body: AQA

Politics course overview

A Level Politics enables you to develop a critical understanding of politics, its processes and the ability to critically evaluate the system. This encourages you to be an informed and active citizen. You will cover politics in the USA and the UK and look at subjects like people, politics and participation as well as how Britain is governed in the modern day.

Upon successful completion of the exam and practical assessments (as administered by AQA), you will have achieved an internationally recognised AQA A Level Politics.

Skills Gained

- You will develop your critical thinking skills and the ability to interpret, evaluate and comment.
- You will develop an awareness of the nature of politics and the relationship between political ideas as well as institutions and processes.
- You will develop an understanding of the structures of authority and how the political system in the United Kingdom works, you will also exam the differences with other systems.
- You will gain an informed understanding of the rights and the responsibilities of the individual.
- You will develop a passion in contemporary politics.

Course outline

This course is divided into 3 units:

1. The government and politics of the UK
2. The government and politics of the USA, and comparative politics
3. Political ideas.

Assessments

The AQA A Level Politics qualification is gained once all 3 exam papers are successfully completed. These exams are administered by the AQA and assessment centre details will be included with your course, as well as practice papers so that

you are more than prepared for your assessments. You will need to contact your local examination centre to work through your coursework requirements.

In addition, there will be a number of tutor marked assessments (TMAs) to ensure that you have a thorough understanding of the course materials, with the tutor sending comments to guide you through any areas of potential difficulty, as well as a range of self-assessments that are indicators that you understand the materials as you work through them. These are for your own information, and do not need to be shown to your course tutor.

Tutor Support

Our A Level courses come with tutor feedback and support by email for 24 months. They will mark your TMAs and provide valuable guidance through any trickier parts of the course whenever you need it. You will also receive a study guide to help you with all aspects of studying, essay writing and general student skills.

Find out more about A-Level Distance Learning Courses.

4. A-LEVEL BIOLOGY AQA

Studying Biology A Level Online

Biology is an introduction to the way life on our planet works. It's an essential science for those planning to pursue a career in medicine, work with animals or in the marine environment. This qualification opens doors to higher education in a variety of STEM related degrees and is lasting proof on your CV that you have developed intensive analytical skills.

Course code: 7402

Delivery method: Online and Paper Based

Course duration: 24 Months

Entry requirements: No prior qualification needed

Award achieved: AQA A Level Biology

Awarding body: AQA

Biology course overview

During this A Level Biology course you will explore biological molecules, genetic information and energy transfers you will go on to understand how this impacts how organisms respond to their environment, genetic populations and the control of gene expressions.

Upon successful completion of the exam and practical assessments (as administered by AQA), you will have achieved an internationally recognised AQA A Level Biology.

Course Outline

This course is divided into 3 units:

Unit 1: Topics 1 to 4

Written examination: 2 hours. 35% of A Level. 91 Marks (76 from short and long answer questions, 15 from extended response questions)

Unit 2: Topics 5 to 8

Written examination: 2 hours. 35% of A Level. 91 Marks (76 from short and long answer questions, 15 from extended response questions)

Unit 3: Topics 1 to 8

Written examination: 2 hours. 30% of A Level. 78 Marks (38 from structured questions including practical techniques, 15 from critical analysis of given experimental data, 25 marks from one essay with a choice of two titles)

Course Content

Unit 1:

- Topic 1: Biological molecules
- Topic 2: Cells
- Topic 3: Organisms exchange substances with their environment
- Topic 4: Genetic information, variation and relationships between organisms

Unit 2:

- Topic 5: Energy transfers in and between organisms

- Topic 6: Organisms respond to changes in their internal and external environments
- Topic 7: Genetic populations, evolution and ecosystems
- Topic 8: The control of gene expressions

Unit 3:

All topics 1 – 8 shown above

Assessments

The AQA A-Level Biology qualification is gained once all 3 exam papers are successfully completed along with coursework and twelve practical assessments. These exams are administered by the AQA and assessment centre details will be included with your course, as well as practice papers so that you are more than prepared for your assessments. You will need to contact your local examination centre to work through your coursework requirements.

The practicals are not marked, but you will need to be observed by an examination centre to demonstrate competence in the different techniques. The practicals are usually held in Spring of each year, while the written exams are in May/June.

In addition, there will be a number of tutor marked assessments (TMAs) to ensure that you have a thorough understanding of the course materials, with the tutor sending comments to guide you through any areas of potential difficulty, as well as a range of self-assessments that are indicators that you understand the materials as you work through them. These are for your own information, and do not need to be shown to your course tutor.

5. A-LEVEL BIOLOGY CIE

Studying International A Level Biology Online

Biology is an introduction to the way life on our planet works. It's an essential for those planning to pursue a career in medicine, work with animals or in the marine environment. This qualification opens doors to higher education, and is lasting proof on your CV of this level of intensive learning.

Course code: 9700

Delivery method: Online

Course duration: 24 Months. *However, you can complete the course in a year or less.*

Entry requirements: No prior qualification needed

Award achieved: CIE A Level Biology

Awarding body: Cambridge

Biology course overview

Cells as the units of life

A cell is the basic unit of life and all organisms are composed of one or more cells.

There are two
fundamental types of cell: prokaryotic and eukaryotic.

Biochemical processes

Cells are dynamic: biochemistry and molecular biology help to explain how and why
cells function as
they do.

DNA, the molecule of heredity

Cells contain the molecule of heredity, DNA. Heredity is based on the inheritance of
genes.

Natural selection

Natural selection is the major mechanism to explain the theory of evolution.

Organisms in their environment

All organisms interact with their biotic and abiotic environment.

Observation and experiment

The different fields of biology are intertwined and cannot be studied in isolation:
observation and
enquiry, experimentation and fieldwork are fundamental to biology.

6. A-LEVEL BUSINESS

Studying A-Level Business Online

Business is the ultimate life skill. By studying this subject at A level, you will be rewarded with a deep understanding of business fundamentals and the current markets. In this course you will study a wide range of topics, such as economics and marketing, both in the UK and globally. It will also give you an edge during your higher studies, should you choose a business-based degree.

Course code: 9BS0

Delivery method: Online and Paper Based

Course duration: 24 Months

Entry requirements: No prior qualification needed

Award achieved: Edexcel A-Level A Level Business

Awarding body: Pearson Edexcel

Course outline

This course is divided into 3 units:

Unit 1: Marketing, people and global business from themes 1 and 4 as well as local, national and global contexts.

Unit 2: Business activities, decisions and strategy from themes 2 and 3 as well as local, national and global contexts.

Unit 3: Investigating business in a competitive environment from all themes as well as local, national and global contexts.

Course Content

Unit 1: Marketing and People

- Module 1: Meeting customer needs
- Module 2: The market
- Module 3: Marketing mix and strategy
- Module 4: Managing people
- Module 5: Entrepreneurs and leaders

Unit 2: Managing Business Activities

- Module 1: Raising finance
- Module 2: Financial planning
- Module 3: Managing finance
- Module 4: Resource management
- Module 5: External influence

Unit 3: Business Decisions and Strategy

- Module 1: Business objectives and strategies
- Module 2: Business growth
- Module 3: Decision-making techniques
- Module 4: Influences on business decisions
- Module 5: Assessing competitiveness
- Module 6: Managing change

Unit 4: Global Business

- Module 1: Globalisation
- Module 2: Global marketing and business expansion
- Module 3: Global marketing
- Module 4: Global industries and companies

Skills Gained

- Developing an enthusiasm for business
- Gaining holistic understanding of business, and a critical understanding of organisations and their ability to meet societies needs and ants
- Understanding of the ethical dilemmas and responsibilities faced by individuals and organisations
- Acquire a range of relevant business and generic skills including decision makings, the challenging of assumptions and critical analysis
- Apply numerical skills in a range of business contexts

7. A-LEVEL CHEMISTRY AQA

Studying chemistry is a great introduction to all science and provides a powerful understanding of how the world is made up. Chemistry is literally the study of matter, how it changes, its composition as well as its structure and properties. Chemistry explores the fundamental building blocks of life. This course will explore physical chemistry, inorganic chemistry and organic chemistry. You will study subjects like atomic structure, kinetics, periodicity, organic analysis and chromatography. Studying chemistry prepares you for further education, particularly if you want to work in medicine or become a scientist.

Course code: 7405

Delivery method: Online and Paper Based

Course duration: 24 Months

Entry requirements: No prior qualification needed

Award achieved: AQA A Level Chemistry

Awarding body: AQA

Chemistry course overview

During this A-Level Chemistry course you will explore bonding, energetics, kinetics, thermodynamics, the periodic table, amino acids, proteins DNA and organic synthesis.

Upon successful completion of the exam and practical assessments (as administered by AQA) you will have achieved an internationally recognised AQA A-Level Chemistry.

Skills Gained

- Developing an enthusiasm for chemistry
- Gaining holistic understanding of chemistry and all the interrelations
- Understanding of the scientific method, and how science fits in with that and the wider contexts
- Acquire a range of relevant scientific skills including evaluation methodology, evidence and data and resolving conflicting evidence.
- Evaluating the role of the scientific community in validating new knowledge and ensuring integrity

8. A-LEVEL CLASSICAL CIVILISATION

The ancient societies of Greece and Rome have fascinated subsequent ages for thousands of years. This course will explore the ancient world and show you how it has shaped and contributed to the world of today.

It's rare to find this subject on the standard school syllabus and this course is a fantastic way to fulfil a passion, or build grounding for exploring classics, history or archaeology at university level. You will study classical sources learning to understand the world from primary texts firsthand.

Course code: H408

Delivery method: Online

Course duration: 24 Months

Entry requirements: No prior qualification needed

Award achieved: OCR A Level Classical Civilisation

Awarding body: OCR

Course outline

This course is divided into the following units:

The World of the Hero

This is a compulsory component consisting of an in-depth study of:

- one of Homer's *Iliad* or *Odyssey*
- and Virgil's *Aeneid*

This component is solely focused on the study of literature in translation.

Culture and the Arts

Learners must study one component in this component group, chosen from:

- Greek Theatre (H408/21)
- Imperial Image (H408/22)
- Invention of the Barbarian (H408/23)
- Greek Art (H408/24)

Components in this group involve the study of visual and material culture. In all except Greek Art, this is combined with the study of literature in translation.

Beliefs and Ideas

Learners must study one component in this component group, chosen from:

- Greek Religion (H408/31)
- Love and Relationships (H408/32)
- Politics of the Late Republic (H408/33)
- Democracy and the Athenians (H408/34)
- Components in this group involve of an area of classical thought, in combination with either the study of literature in translation or visual/material culture.

Visit our website for a full overview of the A-Level Classical Civilisation course.

www.oxfordce.co.uk

9. A-LEVEL ECONOMICS

Studying A level Economics Online

Economics is a valuable subject to study, it gives you an understanding of how the financial world works. Understanding the economic environment is useful in almost any role or career and will be a lasting skill, setting you apart from the competition. This is an engaging and fascinating course that covers both micro and macroeconomics.

Course code: 9ECO

Delivery method: Online and Paper Based

Course duration: 24 Months

Entry requirements: No prior qualification needed

Award achieved: AQA A-Level Economics

Awarding body: AQA

Course Outline

This course is divided into 3 units:

Unit 1: Markets and business behavior

Written examination: 2 hours. 35% of A Level. 100 Marks

(The paper comprises three sections. Students answer all questions from Section A and Section B, and one from Section C. Section A comprises a range of multiple-choice and short-answer questions. Section B comprises one data response question broken down into a number of parts. Section C comprises a choice of extended open-response questions; students select one from a choice of two)

Unit 2: The national and global economy

Written examination: 2 hours. 35% of A Level. 100 Marks

(The paper comprises three sections. Students answer all questions from Section A and Section B, and one from Section C. Section A comprises a range of multiple-choice and short-answer questions. Section B comprises one data response question broken down into a number of parts. Section C comprises a choice of extended open-response questions; students select one from a choice of two)

Unit 3: Any content, relevant practical skills.

Written examination: 2 hours. 30% of A Level. 100 Marks

(The paper comprises two sections. Each section comprises one data response question broken down into a number of parts, including a choice of extended open-response questions; students select one from a choice of two.)

10. A-LEVEL ENGLISH LANGUAGE AND LITERATURE

English Language and Literature combines both the literary and linguistic sides of English. English is considered a core skill by both universities and employers; hence the nuances of grammar and linguistic devices will make you a well-rounded candidate. This A-Level shows analysis, creative thinking, in-depth research techniques, and reading comprehension.

Course code: 9ELO

Delivery method: Online and Paper Based

Course duration: 24 Months

Entry requirements: English GCSE or equivalent

Award achieved: Pearson Edexcel A-Level English Language & Literature

Awarding body: Pearson Edexcel

Course content

Unit 1: Voices in Speech and Writing

- Voices in Speech and Writing: An Anthology
- Arthur Miller, All My Sons

Unit 2: Varieties in Language and Literature

- Emily Bronte, Wuthering Heights
- Angela Carter, The Bloody Chamber

Unit 3: Coursework

- Oscar Wilde, The Importance of Being Earnest
- Wendy Jones, Grayson Perry: A portrait of the Artist as a Young Girl

12. A-LEVEL ENVIRONMENTAL SCIENCE

Understanding the planet, we live on, and the holistic issues associated, is becoming not just a life skill but a major commercial focus. This course is ideal for those who want to embark in careers in ecology, conservation and marine biology.

Candidates with a broad interest in the subject who want to get a better idea of how the living and physical environment interact, will enjoy this course.

Course code: 7447

Delivery method: Online and Paper Based

Course duration: 24 Months

Entry requirements: English GCSE or equivalent

Award achieved: Pearson Edexcel A Level English Literature

Awarding body: Pearson Edexcel

Environmental Science course overview

A Level Environmental Science covers key areas like the living environment, the physical environment, energy resources, biological resources, sustainability and environmental pollution. You will also gain an understanding of the scientific processes used to assess the subject and an appreciation for how this fits into the wider scientific context.

Upon successful completion of the exam and practical assessments (as administered by AQA), you will have achieved an internationally recognised AQA A Level Environmental Studies.
